PRODUCT SPECIFICATIONS

Application

Introduction:

Series TYA oil purifiers remove free and dissolved water, dirt, and free and dissolved air/gases from hydraulic oil, gear oil, engine oil, compression oil, freezer oil, heat treatment oil, compressor oil, refrigeration oil and other industrial oils in metallurgy, machinery, oil field, chemistry, mine, electric power generation plant, transportation and manufacturing enterprises. TYA oil purifiers reduce system wear; improve on-line and system performance; extend fluid life and reduce fluid disposal costs and environmental risks.

To meet customers' special needs, we develop:

- TYA Lubricating Oil Purifier Machine
- TYA -A Fully Automatic Lubricating Oil Purifier
- TYA -W Enclosed Lubricating Oil Purifying Unit
- TYA -Ex Explosion-Proof Hydraulic Oil Cleaning Machine
- TYD High Water Content Hydraulic Oil Water Separator

Features:

- 1.The plant is delivered ready for operation.
- 2.With strong capabilities of demulsification, dehydration and degasification, TYA oil purifier adopts big-cubage, reinforced three-dimension flash distillation column, thin film evaporation technology and large area multi-level separation technology so as to remove water, gas and light hydrocarbon material efficiently and quickly.
- 3.Adopting high-quality filter element and sealing material with corrosion proof, high temperature resistance and excellent mechanical strength, it is suitable even for purification process of high-viscosity oil under rather high temperature conditions and in this way expanding its application scope.
- 4.Fine and precision multi-stage filtration system can remove mechanical particulates thoroughly and effectively.
- 5.With air-cooling and condensation system, it can cool the air in the vacuum system efficiently and quickly, which avoids inconvenience of water-cooling.
- 6.Advanced high pressure protection device and infrared oil level control system for easy operation.
- 7.Perfect automatic and manual oil heating temperature controller, automatic cooling and separation device, simple, safe and reliable.
- 8.High-quality electrical control cabinet, with high-efficiency heat transfer and anti-explosion.
- 9.The equipment can also be installed with digital flow meter and timer for auto calculating and recording oil volume and working time (optional according to user's requirements)
- 10.The machine can be installed with two filtration systems for easy and quick change of filter element without stopping the machine.

PRODUCT SPECIFICATIONS

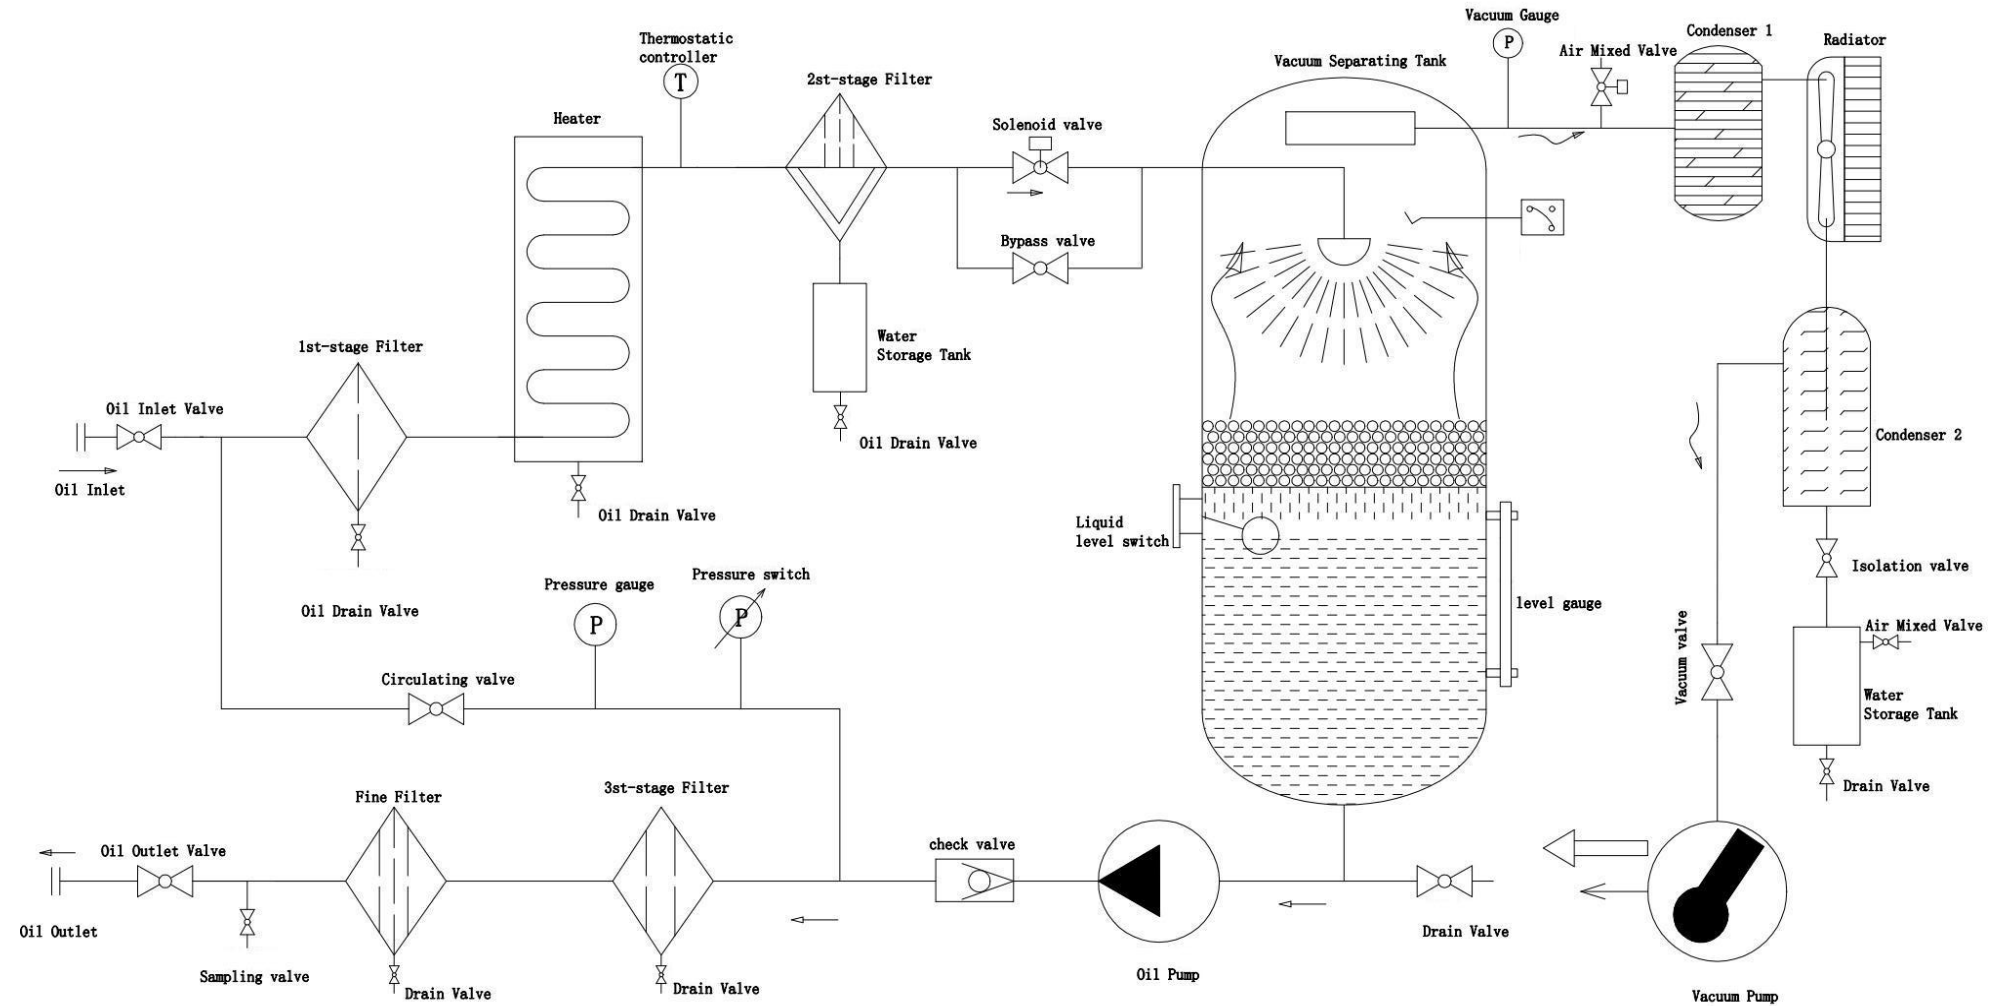

Technical Parameter

Parameters	Unit	TYA-10	TYA -20	TYA-30	TYA-50	TYA -100	TYA -150	TYA -200	TYA -300
Flow rate	L/h	600	1200	1800	3000	6000	9000	12000	18000
Vacuum degree	Mpa	-0.06~-0.096							
Working pressure	Mpa	≤0.5							
Constant temperature control range	℃	0~100(Adjustable)							
Power supply		3Phase, 380V, 50Hz(or as needed)							
Working noise	dB(A)	≤60	≤65	≤68	≤70	≤75	≤78	≤80	≤85
Electric heating power	KW	15	18	24	36	60	90	120	180
Total electric power	KW	17	20	26	39	64	96	128	195
Inlet (outlet) caliber	mm	Φ25	Φ25	Φ32	Φ32	Φ38	Φ50	Φ60	Φ76
Size	mm	1300x900x1650	1300x900x1650	1350x1000x1700	1450x1050x1750	1650x1100x1800	1900x1300x1900	2100x1400x2000	2400x1600x2100
Weight	Kg	350	380	400	450	600	900	1000	1600

Item	Guarantee indexes
Moisture content	≤100 PPM
Demulsification value	New oil≤15min (GB/T7305),running oil≤30min
Mechanical impurities	no(GB/T511)
Gas content	≤0.2%
Clean degree	≤6 Grade (NAS1638)
Filtration precision	5-10μm
